## Venus® Bulk Fill

Faster, esthetic posterior restorations. Simplified.

**Venus® Bulk Fill** is an advanced posterior restorative solution that provides dentists with a faster, easier technique than incremental layering. The result – a reduction in chair time, and a more efficient and cost effective restoration.

- Self-adaptive handling eliminates steps and provides ideal coverage of cavity floor and walls
- Long working time for when you need it
- Highly radiopaque for more accurate diagnosis
- Available in Syringes and PLT's (pre-loaded tips)

## Translux® Power Blue®

Power. Speed. Within your reach.

**Translux® Power Blue®** LED polymerization lamp sets a new standard in cordless LED technology and design. Weighing just 5 oz., the intelligent processor-controlled handpiece emits a powerful, yet energy efficient light of 1000 mW/cm<sup>2</sup>. All the power and efficiency with just one button.

- Ergonomic handpiece with one-button control
- Cordless handpiece with separate charging station provides freedom of movement
- Long-life battery with quick, processor-controlled charging
- Quiet, ventilator-free operation

## Venus® Supra

Long-lasting, high gloss polishers.

Use **Venus® Supra** for polishing all types of composites—you will achieve long-lasting, high gloss polishing effects for naturally beautiful composite restorations.

- Compatible with all types of composites
- Silicone polishers highly filled with microfine diamond powder
- Available in 5 different shapes: Cup, Disc, Flame, Large Cup, Large Flame
- Achieve high gloss polish in only two steps
- Autoclavable
- Latex-Free

### TWO STEPS TO LONG-LASTING ESTHETICS

1. Red — Pre-polisher

2. Grey — High Gloss Polishers

### VENUS® SUPRA

<b>Venus Supra Kit</b> (10 polishers: each of all five shapes as pre- and high gloss polishers)	66039110
<b>Refill-Cup</b> (10 polishers: One shape as pre- and high gloss polishers (each 5x))	66039161

<b>Refill-Large Flame</b> (10 polishers: One shape as pre- and high gloss polishers (each 5x))	66039165

# Venus Diamond®

Any way you layer it, the results are brilliant.

**Venus Diamond®** leads the industry in color adaptability, with a patented formula that provides an outstanding natural look. Just one shade saves time and produces radiant results. Along with superb color esthetics, this revolutionary nano-hybrid composite exhibits exceptional durability, handling and minimal shrinkage.

- Revolutionary nano-hybrid that enables perfect color adaptation, ease of polish and long lasting shine
- Provides high durability with minimal shrinkage
- Extended working time for efficient sculpting
- Universally suited for both anterior and posterior cases
- Replicates nature with a selection of 23 shades that mimic tooth anatomy

# Venus Diamond® Flow

Seeing is believing.

**Venus Diamond® Flow** is a nano-technology based flowable composite that offers high radiopacity, low shrinkage and high flexural strength.

- Ensures reliable diagnosis due to high radiopacity
- Low shrinkage stress
- Higher flexural strength than leading flowables
- Unique Diamond chemistry produces superior esthetics through optimized color adaptation
- Thixotropic handling behavior desired by dentists for easy control
- Improved marginal quality for long lasting restorations
- Ideal as a base or liner under all composite material

## Venus® Flow

Total control. Greater versatility.

**Venus® Flow** saves time and keeps you on task by improving application responsiveness. The engineered, precision-control flowable materials ensure better performance, no waste. Venus Flow also provides a stunning and wide range of shades in three different opacity levels that blends beautifully to natural teeth.

- Thixotropic properties
- Radiopaque and offers fluoride release
- Low viscosity; ideal for a variety of applications
- 14 shades including bleach shades, HKA2.5 and baseliner white
- Shades are perfectly matched to Venus Composite system

## Venus® Temp C&B

The esthetic solution for long-span bridges.

**Venus® Temp C&B** exceeds the expectations of both patients and professionals by giving temporary restorations a unique combination of beauty and strength. Patients undergoing a temporary restoration can now anticipate the same esthetics found in final restorations.

- Venus Temp C&B creates the look of a natural tooth through superior polishability, great color stability and fluorescence, even when under a UV light
- Because of its flexibility and high hardness, Venus Temp C&B is the perfect esthetic solution for long span bridges
- 10:1 Automatically mixed two-component material

## Venus White® Max In-office whitening.

Remarkably efficient—accelerate patients’ whitening with results in an hour or less.

- Three or four 15-minute treatments with 38% hydrogen peroxide gel
- Syringe-to-syringe mixing chemically activates the product, ensures a thorough mix and provides maximum freshness
- Contains potassium nitrate which helps decrease sensitivity associated with bleaching
- Follow in-office treatment with Venus White Pro or Venus White Ultra for best results
- Venus Comfort Gel is available separately and contains potassium nitrate and fluoride

## Venus White® Pro Take-home whitening for custom trays.

High-performance whitening for custom trays take a patient’s smile up to seven shades whiter.\*

- Choose from 16%, 22% or 35% carbamide peroxide strengths
- Contains potassium nitrate which helps decrease sensitivity associated with bleaching
- Mint flavored for patient comfort
- Full Patient Kits, Refill Kits and 50-Syringe Packs available

## iBOND® Self Etch

Bonding with confidence.

- All-in-one bonding adhesive
- High bond strength
- Proven marginal efficacy due to easy evaporation
- Easy, fast and convenient handling
- Patient friendly—minimizes post-op sensitivity
- Scientifically proven in numerous studies worldwide

## iBOND® Total Etch

Proven to outperform the market leader. Every time.

- Etch & Rinse 2-step adhesive
- Clinically proven to provide reliable and consistent bond strength
- Optimized with nano-filler
- Dense adhesive layer and good tag formation for improved marginal sealing
- Only one coat required with no agitation

iBOND® SELF ETCH

## iBOND® Etch

### Reliable strength for all total etch adhesive procedures.

iBOND® Etch etchants are available in two forms and two strengths to provide dentists with a choice. iBOND Etch 35 Gel and iBOND Etch 35 Fluid use the traditional strength of 35% phosphoric acid. iBOND Etch 20 Gel, with 20% phosphoric acid, provides just enough conditioning of enamel and dentin, resulting in less loss of tooth structure and equal bond strength.

#### iBOND® ETCH

<b>iBOND Etch 35 Fluid</b> (1 x 15ml Bottle iBOND Etch 35 Fluid)	66039868

## Gluma® Comfort Bond + Desensitizer

Prime, bond, and desensitize in a single no-mix step.

Get the proven results of **Gluma® Desensitizer** as you bond. **Gluma® Comfort Bond + Desensitizer** patented chemistry lets you stop and prevent sensitivity while bonding. No multiple bottles, so there is less room for technique sensitivity.

- A one bottle adhesive for priming, bonding, and desensitizing
- Suitable for both moist and dry bonding techniques
- Indicated for bonding direct filling light curing composite or compomer restorations
- The only 5th generation adhesive to include Reality's Choice Five-Star award-winning Gluma Desensitizer

## Gluma® Desensitizer

The solution for eliminating post-op sensitivity.

**Gluma®** has been in the market for more than a decade, and has been used in over 45 million restorations worldwide to prevent hypersensitivity. One drop of Gluma is all you need and the result is fast and effective, with no mixing and no curing.

- For treating cervical hypersensitivity
- For use as pretreatment to priming and bonding in direct composite restorations
- For use as pretreatment prior to placing compomer or amalgam restorations
- For use after crown and bridge preparation
- For use prior to crown and bridge cementation or bonding

## Gluma® Desensitizer PowerGel

The same efficacy as Gluma Desensitizer – in a gel form.

- Gel consistency for greater control and accuracy during placement.
- No-drip formula, so it stays where you place it.
- Green color indication for easy visual placement and rinse-clean capability.
- The only desensitizer proven to penetrate exposed dentinal tubules up to 200µ.

## Durafill® VS

The restorative choice for anterior restorations since 1979.

Durafill® VS is a highly polishable and sculptable microfill resin for anterior restorations

- Easy to place and contour—does not slump
- The standard to which other microfill composites are compared
- Excellent alternative for Class V restorations
- In addition to 20 Vita®\* based shades, Durafill VS has three Superlight shades, ideal for bleached, and primary teeth
- Available in syringe and PLT

### DURAFILL® VS

## Charisma®

Maximum color perfection and esthetic appearance.

The microparticle hybrid composite **Charisma®** has proven itself again and again over the last 17 years and is used every day by practitioners around the world. Millions of fillings have already been applied with Charisma worldwide.

- Charisma's high strength and wear resistance provide long-lasting restorations
- Ultra-fine (0.7 microns) Microglass® particles result in a densely smooth surface comparable to natural enamel
- Available in 20 lifelike Vita®\* shades for accurate shade matching and blending

## VibraKleen E<sup>2</sup>® Ultrasonic Cleaning Tablets

### The natural power of enzymes.

- Powerful protease enzymes quickly remove and breakdown hard to clean deposits like blood, bone, and food particles that chemical detergents can leave behind
- Powerful, yet gentle on your equipment
- Biodegradable and pH neutral
- Non-toxic, non-corrosive formula contains no chlorine or harsh alkaline to damage your expensive stainless steel equipment

## Dri-Clave® VK Ultrasonic Cleaning Solutions

### Powerful cleaning with minimal effort.

- Specially formulated for ultrasonic cleaning
- Eliminates hand scrubbing of instruments
- Deep cleans as part of asepsis control program
- Color coded for easy identification

## VacuKleen E<sup>2</sup>® Evacuation System Cleaner

### Cleans with a lemon flash.

- Highly effective powder formula
- Environmentally friendly and safe to work with
- Power of protease enzymes
- Pre-measured packets—saves time and minimizes waste. Just add warm water

#### VIBRAKLEEN® E2 ULTRASONIC CLEANING TABLETS

VibraKleen E <sup>2</sup> Enzyme Ultrasonic Tablets— Box of 20 (Case Lot 24)	50037100
VibraKleen E <sup>2</sup> Enzyme Ultrasonic Tablets Clinic Pack— Box of 80 (Case Lot 12)	50037101

VacuKleen E <sup>2</sup> Evacuation Cleaner Unit-Dose Pouch for Gallons Clinic Pack—Box of 25 Pouches (Case Lot 24 x 28gm)	50036102

\*Each VK solution sold in case lots of four (4) gallons only.

## Flexitime® VPS

Precise detail for accurate fit every time.

- Reliable impressions even in adverse conditions
- Superior hydrophilicity on polyether level
- Exceptional toughness prevents tearing and distortion

## Flexitime® Dynamix® Automatic Mixing Machine

The perfect mix. Every time.

- Fast automated mixing and precise dosage of material
- Selectable velocities for tray and syringe filling
- Void free mixing ensures precision and accuracy

Dynamix Fixation Ring (10 x 2 count)	66036078

## Flexitime® Xtreme

A berry twist to your single unit impressions.

- Achieve efficiency with a 30 to 90 second working time, perfectly suited for your more common single unit impressions
- Save time with a short intraoral set time of 90 seconds
- Minimize single unit remakes with the VPS that minimizes deformations, voids and porosity
- Distinguish between viscosities with high-contrast colors

## Flexitime® Bite

Superior performance. Superior esthetics.

- Sets fast in just 30 seconds
- Scannable without powder for use with CAD technology
- Extremely high shore D hardness of 40
- Whipped cream-like consistency ensures exceptional accuracy
- Easy to trim and does not crumble

## Memosil® 2

Transparent VPS bite registration material.

- Unique clear bite registration material
- High degree of dimensional stability
- Accurate and consistent result—trims neatly
- Ideal material for fabricating standard and light-cured provisional laminates, crowns and bridges

## AGFA Dentus® Diagnostic Film

Soft edges and high-contrast make AGFA the patient's choice for comfort and the dentist's choice for diagnosis.

### Intraoral Film

- Exclusively made with **Softopac®** for increased patient comfort, eliminating irritation
- High contrast and maximum density support the diagnosis due to excellent gray graduation
- Double sealed packets are fully protected from moisture contamination

### Extraoral Film

- Very high definition due to disc grain technique
- Very low Base-Plus-Fog Density
- Particular contrasting in various density ranges
